To Whom It May Concern:

I am delighted to submit my resume for the Junior Front End Developer position. With almost 15 years of professional experience in the graphic design and web world, I have made the exciting decision to strictly focus on becoming an expert in client and server development. I have always loved building and creating things with my hands (be it residential or commercial construction projects, muscle car restoration, and everything in between). I want to be a builder of digital architecture. I have spent the last several years building basic websites for many clients however, in the last year and a half I have jumped in neck deep and am overwhelmed by the potential of my passion for the web and desire to create.

Given the opportunity to partner with an incredible company with a vision and drive, I wish to make magic.

Respectfully Submitted,

Jake Studer
